NOTED WITH INTEREST

WYKOFF BEATS WILLIAMS in 1931, as Los Angeles Coliseum Lights were first lit, as told by the Helms Athletic Foundation:

This was to have been the "race of the century", for the world sprint championship, pitting Frank Wykoff, of Glendale, Calif., who broke the world record for 100 yards at 9.4, on May 10, 1930, at Patterson Field, Occidental College, against the Canadian Flash, Percy Williams, winner of the 1928 Olympic Games 100 and 200. The occasion was the pre-Olympic meet at the Los Angeles Memorial Coliseum, June 19, 1931.

The event was further highlighted by the fact that this was the first time that the lights were to be turned on at the Coliseum for an evening program--lighting facilities having been just installed in the stadium, for nocturnal activities which were to be held in connection with the forthcoming Olympic Games.

A crowd of nearly 40,000 turned out. Joe E. Brown participated in an unofficial 50 yard match race with Wykoff and Williams, to open festivities. For motion picture purposes, Brown was adjudged the winner. The lights were switched on by Mary Pickford, "America's Sweetheart."

Emmett Toppino of New Orleans, who was later to star in the 400 meter relay of the 1932 Olympics, and Cy Leland, of the San Francisco Olympic Club, were other talented starters. The tension was so great at the take-off line, as the sprinters toed the mark, that starter Bob Strehle had difficulty in getting the runners away to a perfect start. However, once the race got under way, Wykoff proved to be the master. He hit the tape first, in 9.5, followed by Toppino, Leland and Williams. Finish fourth, the Canadian wound up in disappointing fashion.

Another feature of the meet was the 440 in which Vic Williams of USC and Ben Eastman of Stanford were the publicized stars. Williams had one win, Eastman one in their duals. This was to be the run-off match. As it turned out, Williams nipped Eastman by a yard in fair time of 48.4.

STATS

HAMMER THROWERS numbering 80 have bettered 57 meters through 1956 (186'11 $\frac{7}{8}$ ")
