BULLETIN BOARD

Next Newsletters Sept. 2, 23, Oct. 7, 21, Nov. 4, 18, Dec. 9, 23. T&FN Mailed Sept. 14
Best Hammer Thrower series is concluded. Our thanks to Humphrey Long for this
interesting feature.

Greatest Sprinters series continues, with four more athletes rated. More from time to time.
Game participant is wanted by TN Glenn Hoidale, 1716 North Mesa, El Paso, Tex. It's a
track game, played by mail, most interesting. Write him for details.

Track Club Coordinator is needed to conduct exchange of information among track clubs in
the U.S. Will be big help in promoting the growth of clubs. Volunteer(s) needed. Write.
Back Issues of Track Newsletter are available. Complete Volume 5, \$3.00. Partial volumes
1, 2, 3, 4 (10 to 12 copies, assorted), \$1.00 each. Small supply.

PAN AMERICAN GAMES PREVIEW

BY Dick Bank

Competition in the III Pan American Games will be surprisingly good. Excepting the throwing events, the countries to the North and South of the United States will provide excellent competition for the U.S. athletes.

A total of 19 nations have entered the track and field competition beginning Aug. 28 and concluding Sept. 2 at Chicago's Soldier Field. Though complete entry lists are not available, most of the top athletes of the Southern Hemisphere are expected to participate. Some of these mentioned here will not be in Chicago but they are included so that no potential winner will be ignored. No area of the world is harder to get track information from than South America.

The competing countries include: Argentina, Brazil, British Guiana, Canada, Chile, Colombia, Cuba, Dominican Republic, Ecuador, Guatemala, Haiti, Mexico, Netherlands Antilles, Peru, Puerto Rico, United States, Uruguay, Venezuela and the West Indies Federation, a new entity which combines Antigua, Barbados, Grandada, Jamaica, Tobago, Trinidad, and other smaller Caribbean islands.

Best sprinter of the group could be Jose Telles da Conceicao. This 28 year old Brazilian has best performances of 10.2 and 20.8, both South American records. His 200 mark was made in a heat of the 1955 Pan American Games. He was sixth in this event at Melbourne. At Helsinki in 1952 he placed third in the high jump with 6'6" and had jumped 6'6 $\frac{3}{4}$ ". His participation in these games is doubtful. Others who figure strongly include 18 year old Harry Jerome of Canada, Dennis Johnson of Jamaica, Manuel Rivera of Puerto Rico and Wilton Jackson of Trinidad. Keith Gardner of Jamaica recently underwent an appendectomy and is out while Mike Agostini who once competed for his native Trinidad, then went to two schools in the U.S. and finally ran for Canada, did not make the Canadian team. Perhaps he'll even turn up on the WIF squad.

Jerome won the Canadian championships in 10.4 on a sub-par track in Winnipeg and has times of 9.5 and 21.1, the former made in the Oregon AAU meet. Johnson narrowly defeated Gardner, British Empire Games winner, in 10.4 in the Jamaican championships last month and is considered an excellent prospect by Herb McKenley. Rivera has run 10.4 and 21.1 this year but is still an unknown quantity as is Jackson, who has 9.6 and 20.8 to his credit. Tom Robinson, BEG 220 champ, has not fully recovered from a leg injury at Michigan and will not compete for the Bahamas. For the U.S. it will be Ray Norton, Bob Poynter and Bill Woodhouse in the 100 and Norton, Vance Robinson and Les Carney in the 200.

Opposition will be extremely stiff in the 400 with four runners who have bettered 47. Easily the best is George Kerr of Jamaica. At Illinois he ran 46.3 for the 440 and on a 385 meter grass track in the Jamaican meet he returned 46.4 to confirm his excellent condition. Basil Ince of Trinidad, also American trained at Tufts College, did 46.7 and won the IC4A. He was only three meters behind Kerr's recent 46.4. Ivan Rodriguez of PR was fourth in the 1958 NCAA and had a fine double this spring of 46.5 and 21.1. Mal Spence of Jamaica, competing for Arizona State College, did 46.7. Canada's Terry Tobacco will be missing. For the U.S. it will be Eddie Southern, Dave Mills and Jack Yerman.

Despite his ability at the shorter distance, Kerr is the fastest 800 meter man in the world for 1959. He won the NCAA championships in 1:47.8 for 880 and in the Drake Relays ran a 1:46.6 anchor leg. Second in the NCAA was Tony Seth of Michigan, who will represent British Guiana in the Pan-Am. Seth ran 1:49.7. Mel Spence, twin brother of Mal, turned in a life time best of 1:49.9 in this year's AAU. Not to be overlooked is Ramon Sandoval of Chile, holder of the South American record of 1:49.0. Third at the Mexico City games of 1955, Sandoval has been prepared by Fred Wilt. Sig Ohlemann of Canada, a freshman at Oregon, has run 1:51.9y and could surprise. Canadian Joe Mullins, 1:49.0y at Nebraska, did not try out for the team. Tom Murphy, Jerome Walters (not in the best of shape) and Ernie Cunliffe (just out of summer camp) will represent the U.S.

Sandoval is the one who seems capable of extending the U.S. entries (Dyrol Burleson, Jim Grelle, Ed Moran) in the 1500 but he'll probably choose the shorter race. He holds the South American record of 3:48.4. At 5000 meters it is a different story. Osvaldo Suarez of Argentina has been running quite well in Europe, breaking his own South American record at Vienna with 14:14.4. Americans Bill Dellinger and Lew Stieglitz looked poor against the Russians and Max Truex is still well below par after suffering heat prostration at Philadelphia (he ran 9:08. in his last all-comers outing.) If Suarez sets a hot pace (and the weather is sure to be a factor throughout the Games) he might be a winner.

It is quite possible Suarez will attempt a double in the 10,000 meters as well. This comes two days before the 5000. The 25-year-old Argentine has run 29:39.6, also a South American record, and about a minute ahead of Bob Soth of the U.S. who will be backed by Alex Breckenridge and Russ Bennett since Truex withdrew. Soth was left in worse shape than Truex after the Philadelphia debacle. Suarez's strongest opposition will come from countryman Walter Lemos whose best performance is only two-tenths slower. Canadian Doug Kyle, who has run six miles in 29:22.8, is another contender.

Both Suarez and Lemos are marathon possibilities and it is quite sure that one of them will be entered but it has not been decided at this time. Favorite among the non-U.S. has to be Gord Dickson of Canada. He confirmed his excellent condition in the Canadian championships on a hot, humid day with 2:25:39.0 and did it without opposition. Johnny Kelley and Jim Green will run for the U.S.

Against Lee Calhoun, Hayes Jones and Elias Gilbert in the highs will be little-known Evaristo Iglesias, who might be a surprise. With no opposition he has run 14.1 and could do considerably better when he meets world class. Strength in the 400 meter hurdles is very good. Jaime Aparicio of Colombia was narrowly beaten by Josh Culbreath in the 1955 Games and has a best of 51.8. He's run 47.6 for 400 meters so he has the necessary speed. Just a step behind is the Brazilian veteran, Wilson Gomes Carneiro. Possessor of a 51.9 timing, he has participated in the last two Pan-Am tests. Dick Howard, Josh Culbreath and probably Clif Cushman replacing Glenn Davis will go for the U.S.

Only steeplechaser of note is Santiago Nova of Chile with a 9:09.0 to his credit. He will face Phil Coleman, George Young and Deacon Jones.

In addition to Telles da Conceicao, Ernle Haisley of Jamaica should prove to be a real high jump threat. British Empire Games winner at 6'9", the Illinois trained leaper reached 6'8 $\frac{1}{4}$ " in the Jamaica championships so he's in good form. Charley Dumas, Errol Williams and Bob Gardner represent the U.S. Puerto Rico's young Rolando Cruz is easily the best non-US vaulter. At Mercersburg Academy this year he did 14'6" indoors and 14'5 $\frac{1}{4}$ " outdoors. He meets Don Bragg, Ron Morris and Jim Graham.

Broad jumper Ary Fancaha de Sa of Brazil was third at Mexico city with 25'8 $\frac{3}{4}$ " but may have difficulty producing the same distance at sea level. Still, he's an experienced veteran capable of a top effort. Antigua's Les Bird won the Penn Relays this year with 25'1 $\frac{3}{4}$ ". A student at Michigan, he's extremely tall for a broad jumper. Jamaica's Paul Foreman, also BEG winner, has a muscle injury and is not expected to compete. Henk Visser, a native of Curacao in the Netherlands Antilles, is not entered. Long jumping for the U.S. will be Greg Bell, Joel Wiley and Irv Roberson.

Though in the twilight of his career, the incomparable Adhemar Ferreira da Silva will be seeking his third Pan Am gold medal in the hop step jump. At Mexico City, the rubber-joined Brazilian produced a world record 54'4" on his final jump. Winner at both Helsinki and Melbourne Olympics, this aging veteran (he'll be 32 in Sept.) is still the class of this hemisphere. His best 1959 performance is 52'4". Arnaldo Devlinish of Venezuela could be trouble for da Silva if the champion falters. He was tied with the Brazilian until the final leap at Mexico City with his lifetime best of 52'11 $\frac{1}{4}$ ". Runnerup in the BEG at 51'5 $\frac{3}{4}$ ", Jack Smyth of Canada is doubtful because of an injured ankle. Ira Davis, Herm Stokes and Bill Sharpe are in for the USA.

Little opposition will be presented the USA in the throwing events. Argentina's Gunther Kruse is the best discus man with 173'4 $\frac{1}{4}$ " and was a finalist at Melbourne. He meets Al Oerter, Dick Cochran and Parry O'Brien. Reinaldo Oliver has done 233'8" in the javelin and placed fourth in the 1954 NCAA while attending the University of Puerto Rico and throws against Al Cantello, Buster Quist and Phil Conley. Ricardo Heber has done 233'1" and the Argentinian held the US national freshman record while at Arizona State. Little opposition is in store for U.S. shot putters (O'Brien, Davis, Long) or hammer-throwers (Hal Connolly, Bob Backus, Al Hall).

Overall, while the United States team should dominate the Games it should get fine competition from these athletes. The other countries will make it interesting on the track and in the jumps. True, it is winter now in South America but if Suarez' record run in Vienna is any indication, these Latins will be in excellent condition. The entrants from Jamaica, Trinidad, Puerto Rico and Canada have confirmed their fine form in recent weeks.

The 1955 Games produced world records in the hop-step-jump (54'4") and 400 meters (45.5 by Lou Jones) and great broad jumping, but so fast is track moving that most of the meet records are in danger. Only the weather, which can be hot, humid or wet, presents a problem although the track is new and untried.

15 (tie). GYULA ZSIVOTSKY (Hungary) Best Performance: 210'3 $\frac{5}{8}$ " Points: 51

The successor to the great Imre Nemeth and Jozsef Csermak has arrived on the scene in the form of the 21-year-old Gyula Zsivotsky. Not only has this young Hungarian followed in the tradition of his compatriots, he has surpassed them in distance achieved. In 1957 Zsivotsky reached 204'8" and improved this to 210'3 $\frac{5}{8}$ " in 1958 when he also placed third in the European Games at Stockholm. So far this youthful prodigy has beaten 200 feet 17 times in two years and his future is bright with promise. Once the veterans, who rule the roost at the moment, begin to fall away, Zsivotsky and the other young European hopes will come into their own and rise further up the world ranking list.

3rd European Championships	1958	1	Throws Over 198'	1	1
			Throws Over 200'	9	18
All Time World List	15th	6	Throws Over 205'	7	21
			Throws Over 210'	1	4

15 (tie) CLIFF BLAIR (U.S.A.) Best Performance: 216'4 $\frac{1}{2}$ " Points: 51

In 1956 the athletic's world was shaken by the news that an unknown American hammer thrower, Cliff Blair, had beaten the world record with a throw of 216'4 $\frac{1}{2}$ ". The record was amazing at the time but it did not last long and neither did the career of Blair. From this high water mark he sank to only 191'11" in 1957 and has not reached this figure since. Blair was bounced off the U.S. Olympic team in Melbourne for writing newspaper articles. All his achievement points were scored in 1956 which shows how shallow his ranking position of sixth on the world list is. Our ranking list certainly does not rate him as high as that.

3rd World List	1956	8	World Record 216'4 $\frac{1}{2}$ "	1956	10
4th U.S. List	1951	2

			Throws Over 215'	1	5

17. OLGIERD CIEPLY (Poland) Best Performance: 210'2 $\frac{1}{2}$ " Points: 46

Olgierd Cieply is another young thrower who has come to the fore in the last two years. Ranked 101st in 1955, the 22-year-old Pole has jumped to 16th on the all-time list in 1958. Modern standards are so high that even a successful thrower like Cieply has not achieved a position in the top ten for 1957 or 1958 even though over 205' each year. Cieply's best performance to date was probably his third place in the Poland vs. USA meet ahead of world record holder Hal Connolly. In two years the Pole has exceeded 200 feet 13 times and it is on this that he must depend for points in our achievement list as Cieply has won no major competition nor achieved no high annual rating. Like Ellis and Bezjak, Cieply has plenty of time for improvement in the future.

3rd vs. USA	1958	2	Throws Over 198'	3	3
			Throws Over 200'	4	8
All Time World List	16	5	Throws Over 205'	8	24
			Throws Over 210'	1	4

18. (tie) DIMITRY YEGEROV (USSR) Best Performance: 210' Points: 45

Another of the fine Russian throwers, Dimitriy Yegerov has performed steadily since 1955 and he is now ranked 17th on the all-time list and eighth on the Russian list. In 1956 Yegerov had a good year, gaining fifth on the year list with 208'6½" and travelling to the Olympic Games where he placed seventh. The following year saw Dimitry down to 202'3" but in 1958 he had a return to his best form though only two throws over 200'. Yegerov would place higher in our list if he could have recorded more marks in the 200 plus range but being overshadowed by his more successful compatriots he has had little chance of competition outside the Soviet Union.

10th World List	1955	1	Throws Over 198'	3	3
5th World List	1956	6	Throws Over 200'	6	12
3rd European List	1956	3	Throws Over 205'	4	12
			Throws Over 210'	1	4
All Time World List	17th	4			

18. (tie) MIKE ELLIS (Great Britain) Best Performance: 211'9½" Points: 45

Michael Ellis, the British record holder, was only 21 when he surpassed 210' and became the first Briton to do so. In his first real year of senior competition after leaving the RAF Ellis fulfilled all his early promise with a series of great late season performances. Three times he beat 205 feet, beat the world record holder Connolly in London and beat the Polish aces Ciepły and Rut in Warsaw. In 1958 Ellis began well, bettering 200' five times and winning the Empire Games title in Cardiff with his best throw of the year, 206'4½". Lack of training time led to a falling off in Ellis' form later in the season and he was not in top shape for the European Games. Such youthful talent will not fade away, however, and Ellis is certain to go from strength to strength in the years to come.

5th World List	1957	6	1st British Empire Games	1958	3
3rd European List	1957	3	Throws Over 198'	3	3
			Throws Over 200'	4	8
All Time World List	13th	8	Throws Over 205'	2	6
			Throws Over 210'	2	8

20. MILOS MACA (Czechoslovakia) Best Performance: 201'6½" Points: 35

Along with shot-putter Jiri Skobla, Milos Maca was the outstanding field even exponent in Czechoslovakia in the early 1950s. Maca's best year was in 1953 at 26 when he ranked second in the world with 200'1½". He fell away in the following year, reaching only 193'4" but came again in 1955 with a best of 201'6½" in the qualifying rounds of the Czech title meet. This was the high mark of the burly Czech's career as he has never since approached 200 feet. Maca makes this list because of his high standing in the early 1950s. He never won a major championship and only had five throws over 198 feet in his career.

7th World List	1952	4	2nd European List	1953	4
2nd World List	1953	9	5th European List	1955	1
9th World List	1954	2			
6th World List	1955	5	Throws Over 200'	5	10

THE GREATEST SPRINTERS

ARTHUR JONATH (Germany)

51 points

Arthur Jonath came to Los Angeles in 1932 reputed to be perhaps the fastest 100 meters runner ever produced in Europe up to that time. On June 5 of that year he had tied Percy Williams' world record of 10.3. Along with Daniel Joubert of South Africa and Takayoshi Yoshioka of Japan he was known to be the only serious threat to the American trio of Ralph Metcalfe (the favorite), Eddie Tolan (who won) and George Simpson (fourth). The Los Angeles race ran true to form when all six of these men reached the final. Jonath was the first white man across the line, finishing third in 10.4 and thus gaining a bronze medal.

Score:

HARRISON DILLARD (U.S.A.)

Points: 52

An Olympic gold medal winner in both the 100 meters and 110 meters high hurdles, Harrison Dillard goes down in history as one of the most remarkable of all track athletes. Dillard was good enough to qualify for the U.S. team for the 1948 Olympic 100m after he had hit a barrier and fallen to the track in the trials for his favorite event. Dillard then astonished most of the experts by defeating Barney Ewell, Lloyd LaBeach and Mel Patton to win the 100m final at London. Harrison then waited four years to win his gold medal in the hurdles at Helsinki, where he defeated Jack Davis in a tremendous race.

Dillard not only held world records of 13.6 and 22.3 in the high and low hurdles. He also ran 100 yards in 9.4 and 100m in 10.3. He goes down in history as the greatest hurdler up to his day as well as an Olympic champion in an event that came to him as a last minute substitution for his own domain. There is no telling how great a sprinter Dillard might have become had he confined his career to these events and never run the hurdles.

THE GREATEST SPRINTERS

H. F. V. EDWARD (Great Britain)

53 points

Born in British Guiana, Harry F. V. Edward performed nobly for Great Britain in the 1920 Olympics. He defeated Jackson V. Scholz for the bronze medal in the 100 meters behind Paddock and Morris Kirksey, and in the 200m he finished behind Allen Woodring and Paddock and ahead of Loren Murchison who had been left on his marks in the 100.

In his book on the Olympic Games, Harold M. Abrahams, honorary president of the International Association of Track & Field Statisticians, asserts of that 1920 100m: "Paddock was, I think, a trifle lucky to win the 100m final, in which there were three other Americans, a Frenchman, Ali Khan, and H. F. V. Edward, from British Guiana, representing Great Britain. The start was a very bad one, and at his best Edward, who had beaten the Americans Scholz and Kirksey in the semi-final, was good enough to win."

D. F. LIPPINCOTT (U.S.A.)

53 points

Donald F. Lippincott of the University of Pennsylvania was the first man to set a world 100 meters record of 10.6 seconds. He did this in 1912 and it was not tied, officially, until Jackson V. Scholz came along in 1920. Paddock reduced it to 10.4 in 1921, though in that same year Paddock was clocked in 10.2 for 110 yards. Lippincott's second place in the 1912 Olympic Games 200 meters after his third in the 100 places his name indelibly among the major sprinters of the early years of organized track and field.
