10 YEARS OF TRACK AND FIELD

Part VII - The Steeplechase

By Humphrey J. Long

<u>World Record:</u>	<u>1950</u>	<u>1960</u>
	8:59.6	8:32.0

There was no official world record for the 3,000 meter steeplechase until 1954 because the International Amateur Athletic Federation didn't think that courses throughout the world were standard enough to warrant world record status for this event. Thus the 8:59.6 by Erik Elmsaater of Sweden could only be called the "best on record" performance prior to the start of the 1950 season. In 1950 the target for all world class steeplechasers was a nine-minute clocking but in fact only man -- Sweden's Curt Soderberg -- achieved this time during the year. The 1950 European Championship final was won by Jindrich Roudny of Czechoslovakia in 9:05.4 with the next two men home also beating 9:10.0.

A far better race was run in Moscow on July 10, 1951 when six Russians set out to improve Elmsaater's time. Vladimir Kazantsev set a very fast pace throughout and won in 8:49.8 with second place Mikhail Saltikov clocking 9:04.4. This made Russia's first major entry into steeplechasing a very impressive one. Kazantsev confirmed this performance with two later sub nine minute clockings. Saltikov also improved to 8:57.6 during one of these races.

Going into 1952 Kazantsev improved his best to 8:48.6 to set himself up as the favorite for the Olympic gold medal. In the first heat at Helsinki Kazantsev duly broke 9:00 for an Olympic best. John Disley of Great Britain and Olavi Rinteenpaa of Finland repeated this feat in heat two. However, the biggest surprise came in heat three when Horace Ashenfelter of the United States ran 8:51.0 to finish ahead of Saltikov. The final saw a great duel between Ashenfelter and Kazantsev. The American set an unheard of pace only to have the Russian stick with him and then overtake him on the last lap. However, coming out of the last water jump Ashenfelter exploded past the surprised Kazantsev to win in a great 8:45.4. The Russian, disheartened, only just salvaged second from Disley. The first seven finishers in this historic race beat 9:00.

Rinteenpaa ran a personal best of 8:54.4 following the Olympics and then on August 2, 1953, cracked Ashenfelter's mark with a solo 8:44.4 in Helsinki. No other steeplechaser came within three seconds of this time during the 1953 season but altogether 10 men did manage to break 9:00.

The IAAF decided that the European Championships of 1954 should see the inaugural world record for the steeplechase and the best of Europe lined up with this as the prize besides the gold medal. Veteran Kazantsev did not make the Russian team and Rinteenpaa was the heavy favorite. Hungary, however, produced the winner when Sandor Rozsnyoi just beat Rinteenpaa in 8:49.6, the first official world record. Poland's Jerzy Chromik showed great promise in a heat but injury prevented him from competing in the final. Later in the year Pentti Karvonen of Finland, who placed fourth in the European Championships, ran 8:41.4 at Dortmund, Germany, but the mark was not acceptable because of a faulty water jump. General steeplechase standards rose sharply in 1954 as 19 men broke 9:00.

In July 1955 Karvonen twice improved Rozsnyoi's clocking, first with 8:47.8 and then 8:45.4. In August the latter time was equalled by Russia's Vasiliy Vlasenko. By this time the recovered Chromik began to take charge. On the last day of August at Brno he ran a fine 8:41.2 followed 12 days later by an even finer 8:40.2 at Budapest. In Moscow on Sept. 11 Disley set a British best with 8:44.2 and followed this up by beating Chromik in London. In this race Disley was second to Eric Shirley's 8:47.6 while in third place ex-miler Chris Brasher also was ahead of the Pole.

The first mark of note in 1956 was made by Phil Coleman of the U. S., who ran 9:00.8 in the Olympic Tryouts. Ashenfelter was back in the third spot. However, two weeks later in Europe Hungarian Laszlo Jeszenszky came close to the world record with a runaway 8:40.8 in Budapest. But the best was yet to come. At the Russian Championships on Aug. 14, 23-year-old Semyon Rzhishchin clipped four tenths off Chromik's mark with an 8:39.8. Kazantsev was fourth in this race. A month later, Hungary met Czechoslovakia in a dual meet and European champion Rozsnyoi ran an unextended 8:35.6 to shave four more seconds off the world mark. At the Olympic Games in Melbourne Ashenfelter ran 8:51.0 in the first

WIND SPRINTS

The long-time shot put rivalry between Parry O'Brien and Bill Nieder has broken out into a verbal duel. It all started at the Santa Barbara Easter Relays when Nieder said that O'Brien is a good thrower but a poor champion because he wouldn't face him in a throw-off. Nieder made the remarks after O'Brien failed to show up at the meet. A relays spokesman said O'Brien was originally entered by the Southern California Striders although it was never made definite he would appear. Nieder said at the meet: "Where is the Los Angeles 'Dodger' today? O'Brien is a great thrower but a poor champion. All good champions come out for the battle and Parry has been avoiding me long enough." However, O'Brien thinks Nieder is the dodger. "Who's dodging whom?" O'Brien asked. "If anybody is doing the dodging it's Nieder. I had never planned to enter the Santa Barbara meet but he (Nieder) was entered in the Mt. San Antonio meet but has pulled out for the Kansas Relays. I'll definitely be at Mt. San Antonio." ... in a poll conducted by the Southern California track writers O'Brien was picked to top the performances of his rivals this weekend. O'Brien was a 23-17 choice to beat Long while in a three-way duel it was O'Brien 16, Nieder 15 and Long 9. ... Dave Davis is currently the nearest thing to a human cannon. When Davis threw 64'10 $\frac{1}{2}$ " in an exhibition recently he had 32 puts over 60 feet. Fifteen went between 60 and 62', 10 between 62 and 63', four between 63 and 64' and two over 64 feet. ... Jim Bates, Southern California's sophomore sprinter, will probably be out of action for about a month because of a pulled leg muscle ... Oregon sprinter Roscoe Cook also has been hampered by a pulled muscle ... although Hayes Jones and Ed Moran posted impressive victories in the Marine Corps Relays neither was satisfied. Jones won the high hurdles in 13.6 but he said: "I'm bad on the last three hurdles. I've got to improve." Moran won the mile in 4:04.6 but he had hoped to meet the Olympic qualifying standard of 4:02.0. World record holder Al Cantello had his troubles in the javelin at the Marine Corps meet. He had a bad back and aggravated the injury on his first and only throw. However, his 200'8" toss took fifth. ... Dave Sime also was a casualty at Quantico. On Friday he said he hoped to avoid any more injuries before the Olympic Trials. However, on Saturday he pulled a muscle and had to scratch from the final of the 100 meters. The injury isn't believed to be serious.

heat but failed to qualify for the final because he finished sixth. The final itself was a great yet amazing race. All of the world's best except the ailing Chromik were in the field but it was an outsider -- Chris Brasher -- who took the honors. Rozsnyoi and Ernst Larsen of Norway led around the final curve only to be overtaken and outrun by Brasher down the final straight. Brasher's 8:41.2 was a new British best and an Olympic record. The next five finishers also were inside the 1952 winning time. Something of a stir was caused at the time by Brasher's disqualification and subsequent reinstatement caused when he brushed against Larsen entering the home stretch.

In 1957 no one broke 8:40.0 with Rzhishchin the leader at 8:40.4. Chromik and Rozsnyoi took no part in the season's proceedings and Brasher announced permanent retirement. Rzhishchin continued to dominate the event going into 1958 and on July 21 succeeded in equalling the world record of 8:35.6. But Chromik made a great comeback and after missing the world mark by one tenth of a second in June broke all records in the Poland-USA dual meet with an 8:32.0. Countryman Zdzislaw Krzyszkowiak was second in 8:33.6, also inside the old standard, while Coleman set an American record of 8:40.8 in third place. At the European title meet Rozsnyoi couldn't run for Austria, his new country of adoption and so was unable to defend his championship. In the final Chromik, fit for a big race at last, tried to run away from Rzhishchin but tired badly over the last kilometer. The Russian tried to close the gap but fell short. Chromik won in a meet record 8:38.2 with Rzhishchin clocked in 8:38.8. Others who broke 8:40 during the season were Germans Hans Huneke and Hermann Buhl with bests of 8:37.4 and 8:37.6, respectively.

Ill health again struck Chromik and he missed the 1959 season, thus allowing Rzhishchin to regain the leadership in this event. Rzhishchin's best of the year was 8:37.8 and another Russian -- Nikolay Sokolov -- clocked 8:39.8 to become the second Soviet runner to beat 8:40. Unless the Poles return to sudden form, the Russians appear to hold the trump cards at Rome. Unless, of course, something unexpected happens at Rome such as Ashenfelter at Helsinki and Brasher at Melbourne. Could the unexpected happen a third time?

THE FASTEST HUMANS ON BOARDS

Part Eight of a Series

By Wally Donovan

(Author, All-Time Indoor Record Book)

The return to competition of so many service athletes and the revival of Olympic competition after a lapse of 12 years made every athlete train more faithfully and work harder during the 1947 season. With their sights trained on the Olympics, scheduled for London in 1948, athletes, coaches and officials helped to create new interest in track and field. The result was more exciting competition and more record breaking performances.

Barney Ewell, Ed Conwell and Tom Carey, who were the leading indoor sprinters, took turns beating each other. Carey won a sprint series from Conwell at the Brooklyn Knights of Columbus meet. However, a Manhattan freshman, Joe Cianciabella, provided the most excitement by beating Carey and Conwell in the 80. A week later, Cianciabella proved it was no fluke by taking away from Carey the Metropolitan AAU indoor 60 title.

At the Philadelphia Inquirer Games, Cianciabella wound up in the 50 final against Conwell, Ewell and Carey. The bullet-starting Conwell came out of his blocks first and beat Ewell by two feet, setting a record of 5.2. Later, Ewell came back to win the Charley Paddock Memorial 300 in 33.1, slicing a tenth off the meet record. He beat Elmore Harris, the national outdoor 400 champion.

Conwell, Ewell and Carey all won their heats at the Millrose Games. The fourth heat was won by Illinois' Bill Mathis, who beat Glenn Davis, Army's celebrated football star. Davis was shut out in the second semi-final won by Conwell with Ewell second. Carey and Mathis eliminated Cianciabella in the other semi. In the final Ewell knew he had to start at least even with Conwell if he was to beat him. And he did as he and Conwell came racing up the straight on even terms for 40 yards. Ewell pulled away slightly at the end to win by inches. He equalled the indoor record of 6.1. Conwell held off Carey for second as Mathis finished last. It was Ewell's fourth Millrose victory in nine years. Carey beat Ewell in a 50 at Boston but Barney came back to whip the national indoor champion at the New York A.C. Games.

A great field was on hand for the National AAU Championships. Carey knew he had

his work cut out for him if he was to successfully defend his title. After the heats, Carey, Davis, Ewell and Bill Martineson of Baylor won the quarter-finals. The stage was now set for some of the most sizzling sprinting ever seen in Madison Square Garden. Carey and Davis had both run 6.2 in their heats and quarter-finals. They were matched in the first semi-final against Ewell and Rudy Nedd. Carey and Ewell both bolted from their blocks as though shot from a cannon. Down the gray pine boards they went, almost as a team, with Davis in hot pursuit. Carey and Ewell seemed to cross the finish line together and that's just how the judges called it -- a dead heat. Even more surprising was that both of them tied the indoor record of 6.1. After that, Conwell's 6.2 in the other semi, beating Garion Campbell of Michigan Norman (now Eastern Michigan), was anti-climactic.

The crowd sensed a great race in the final. Carey was running faster than ever. Ewell had never looked better. But both of them knew the deadly fast-starting technique of Bullet Ed Conwell. No one seemed to notice Campbell as the clerk called the four finalists to their marks. The gun sounded and Conwell was off and flying. The fastest starter since Loren Murchison had a big lead on Ewell and Carey but they were closing fast at the tape. Conwell's time equalled the indoor record of 6.1. It was the third time that night the record was tied. Ewell, Carey and Campbell finished in that order behind Conwell.

Ewell squared things with Conwell by winning the New York Knights of Columbus 60, again tying the indoor 6.1 record. It was Ewell's third K of C victory in four years and with it he again won the number one sprint ranking he had held in 1942 and 1945.

Carey opened the 1948 indoor season by winning the sprint series at the Brooklyn Knights of Columbus meet. He defeated Cianciabella, Conwell, Ewell and Ira Kaplan of New York University, who surprised by running second in the 80 and 100. Kaplan was fifth in the 60.

Conwell came back to beat Carey for the Senior Metropolitan AAU 60 title and then won over Ewell, Cianciabella and Carey in the Philadelphia Inquirer 50. Conwell's time of 5.2 equalled the meet record he set in 1947.

At the Massachusetts K of C meet in Boston, the 30-year-old Ewell won the 50 with Dick Houden of the Illinois A.C. second, Cianciabella third and Kaplan fourth. Conwell was shut out in the head as his leg seemed to bother him.

Ewell, Conwell, Carey and Cianciabella all won their heats at the Millrose Games before a sellout crowd. In the first semi, Conwell faced Cianciabella, Fred Jones of Lincoln University and Fred Johnson of Michigan State. Jones was the winner with Cianciabella second. Conwell's leg again failed him. In the second semi Carey defeated Ewell. However, they didn't race again that night because Ewell was tossed out of the final because of two false starts. Carey, the 32-year-old veteran of the New York Pioneer Club, won his first Millrose gold watch by beating Jones and Cianciabella in 6.2.

At the Boston A.A. Games, Ewell, pacing himself for the Olympics, defeated Carey in the 50, thereby repeating his 1942 success. Jones was third and Cianciabella fourth. Conwell came back to win the New York A.C. dash from Ewell, Cianciabella and Carey.

One of the strangest sprint races on record was the final of the 60 at the National AAU Championships. The four finalists were Conwell, Carey, Ewell and Mathis, who was making his first New York start of the season. Mathis, who was having good starts all night, got away very well in the final and led Conwell by a yard at the 50 mark. At this point Mathis stumbled as he lunged for the tape and Conwell came up fast at the tape. The judges ruled Conwell the winner and the crowd sent up a terrific din in protest. Mathis went to the judges and argued with tears in his eyes. Conwell even offered his gold medal to Mathis, who refused the gesture. After a half hour the judges took another vote and gave Mathis the decision and a record-tying 6.1. It was not until 10 months later at the AAU convention, in an unprecedented action, that the track and field committee ruled that Conwell should be listed as the winner. Investigation showed that the change in the judges decision was not in accordance with the rules.

The four Garden winners of the season met in the final of the 60 at the New York K of C meet. They were Cianciabella (IC4A), Carey (Millrose), Conwell (NYAC) and Mathis (AAU). Conwell beat Mathis off the mark and won by a good margin. He had gotten revenge for the reverse decision at the AAU meet. The victory also enabled Conwell to regain the number one sprint ranking he had held in 1944.

(Next Installment: the debut of Seton Hall's Andy Stanfield)
