BULLETIN BOARD

Next Newsletters June 1, 22. Track & Field News mailed May 26.

You are all invited to a Track Nuts dinner on Friday, July 1, following the first day of the Olympic Trials at Stanford, Calif. No-host cocktails will be at 8 p. m. with dinner about 9. There will be track talk, a few guests, a report on the newly organized Track & Field Society (formed to promote track) and fellowship. Tickets are \$4.50 for a full-course top-quality dinner, including tax and tip. Tickets must be ordered in advance from Track & Field News, P. O. Box 296, Los Altos, Calif.

WIND SPRINTS

Parry O'Brien has decided not to meet Bill Nieder in the Agathon Olympiad at Logan, Utah, this Friday. O'Brien, contacted by telephone, told Agathon advisor Art Mendini: "I don't want to compete again against Nieder right now." Nieder, who defeated O'Brien in the Drake Relays, is expected to face Jay Silvester and Dave Davis in the Utah meet. The reported feud between Nieder and O'Brien appears to be blowing over. Last week, Nieder predicted anyone putting more than 63'10" would win the Olympic Trials this year but he doesn't think O'Brien can do it. "If he reached 64 feet, as they say he has, it was downhill and off a cliff," Nieder said. However, it was a different story this week. Nieder told San Francisco sports writer Art Rosenbaum: "I feel that this feud talk has definitely gone too far. Off the field we are as good friends as any two people, but in competition we try to fire ourselves up in order to produce a maximum effort. The only feud is in the shot put ring but I certainly do not like the impression that we are two kids calling each other names. Please deemphasize our feud and concentrate on our shot putting." ... Southern California shot putter Dallas Long has been bothered by a pulled ligament in his right shoulder. Long said he had been bothered by a painful ache in his arm for three or four weeks but that the ailment wasn't diagnosed until May 5. ... two corrections have been made in the summary of the Occidental-Stanford-Southern California meet which appears on page two. Dick Tomlinson, who was credited with a 243'3 $\frac{1}{2}$ " javelin toss, actually threw 240'3 $\frac{1}{2}$ ". The other change involved SC's Farlow twins. Wayne was given third in the 880 by the officials. However, it developed that Warren placed third. Wayne actually finished eighth. ... when John Thomas cleared 7'1 $\frac{1}{2}$ " for a world record at the Penn Relays he had only one miss and that came at 6'10". When going for 7'2 $\frac{1}{2}$ " he had a very good second try, only taking the bar off with his trailing leg after it appeared he was over. ... in a recent Southern California Striders practice meet Dave Perry cleared 6'8" in the high jump while Jerome Walters and Bobby Seaman posted some good times in the 1320. Walters clocked 2:58.3 for the odd distance while Seaman had a 2:59.5. In other performances, Tom Whetstine high jumped 6'6", Mike Larrabee ran a 47.9 quarter, Bob Soth ran 4:19.5 and 9:27.6, Rafer Johnson did 14.9 in the high hurdles and Steve Seymour threw the javelin 214'7" ... sprinter Leamon King is making a comeback. In his first race in two seasons at Taft, Calif., on May 7 King was timed in 10.5 for 100 meters but placed second Doug Smith's 10.3.

NOTED WITH INTEREST

Veteran coach Dean Cromwell gave some advice to decathlon men Rafer Johnson and C. K. Yang recently, reports Los Angeles sports writer Maxwell Stiles.

"Both Rafer and Yang had been questioned by the scribes on their training. Yang revealed he still suffers from shoulder and elbow injuries to his throwing arm and Rafer said the broad jump is the event that had led to most of his leg injuries and he has done no leaping in this event so far this year. 'Tell Yang,' Cromwell told Johnson, 'that he ought to lay off all training and competition in the three throwing events until he gets that arm and shoulder well. He's already on the team and will be in Rome. He doesn't have to prove anything to anyone in May or June. I think he should concentrate on the running and jumping events and let the arm rest until July. And as for you, I suggest you broad jump off the wrong foot. You are ambidextrous with your arms and you can be ambidextrous with your feet. Do you jumping off the other foot and you'll still score a lot of points. Train hard for the 1500 meters and you can add 500 points to your score right there. Your legs may get awfully tired, but the 1500 won't hurt them. Yang ought to do likewise.' "

10 YEARS OF TRACK AND FIELD

Part VII - The High Hurdles

By Humphrey J. Long

<u>World Records:</u>	<u>110mHH</u>	<u>120yHH</u>
1950	13.7	13.6
1960	13.2	13.2

The American domination of the high hurdles, so complete in pre-World War II days, was continued well into the 1950's. The U.S. speedsters made a clean sweep of the 1948 Olympics event even without world record holder Harrison Dillard, who failed to qualify for the American hurdles squad.

In these immediate post-war years European hurdlers lagged far behind their American counterparts. Dillard, with his blazing speed on the flat, was considered the fastest and therefore the greatest hurdler even seen until the sudden advent of Dick Attlesey in the 1950 season. This 6'3", 21-year-old senior from the University of Southern California astounded the track world with a great series of marks, both in America and in Europe. In a heat at Fresno, Calif., on May 13 he ran 13.5 to set a new world's best for the 120-yard high hurdles. His previous best was only 14.0. There were many sceptics of Attlesey's speed and ability but he confirmed his number one rating by winning the NCAA title in 14.0 and then followed this by taking the AAU title in 13.6 for a world 110 meters hurdles mark. Travelling to Europe the big Californian was unbeatable. His top mark of 13.5 came at Helsinki on July 10. This improved his metric hurdles world mark by a tenth of a second and confirmed Attlesey as an all-time great among hurdlers.

At the end of the 1950 season Attlesey was unbeaten in 40 races with an average time of 14.062 and with his name listed for both hurdles marks. Attlesey had another successful year in 1951 and won the AAU and Pan-American Games titles in addition to posting a season's best of 13.6 at the Coliseum Relays. But another rising star, Jack Davis, stole some of the headlines with a great 13.7 120 yards time in winning the NCAA title. Davis also was runner-up at the AAU meet.

Unfortunately Attlesey pulled a muscle in an indoor meet early in 1952 and received a setback in his plans to gain Olympic honors. At the Coliseum Relays, three men, Craig Dixon, Davis and a rejuvenated Dillard, beat Attlesey, all clocking 14.0. The world record holder was no longer the invincible flash of the past two years. Davis retained his NCAA title but the great Dillard took the AAU crown with a wind-blown 13.7 ahead of Davis and Dixon. In the first heat of the Olympic Tryouts Attlesey pulled up lame and was out of contention. The final field was still an all-star lineup but six false starts soon had them rattled. At the gun only Dillard got away well with Davis close behind. These two took the first two places but behind them the struggling Dixon crashed into a barrier and fell, letting Art Barnard in for third. At the Olympics in Helsinki these three duly finished 1-2-3 with Dillard and Davis sharing a record time of 13.7. Thus Dillard completed a fantastic Olympic double spanning four years -- the 100 meters title in 1948 and the hurdles crown in 1952.

Davis dominated the highs in 1953 by going through the year unbeaten. He won the NCAA/AAU double and had a season's best of 13.8 without a wind and a wind-blown 13.6. No one else beat 14.0 in either 1953 or 1954. In the latter year, Davis extended his unbeaten streak by retaining his AAU crown and having a legitimate 13.6 at Compton. Possibly it was the lack of really tight opposition that prevented Davis from cracking Attlesey's marks. Russia's Yevgeniy Bulanchik, fourth at Helsinki, took the European title in an unspectacular 14.4.

Early in 1955 Davis easily won the Pan-American Games title in 14.3 but his season was not a clean sweep. Milt Campbell, the great decathlon prospect, won both the NCAA and AAU titles in 13.9. Davis was disqualified from the AAU final for jumping. However, the California flyer came back in 1956. Davis was under 14.0 almost every time he ran but Lee Calhoun, the number one indoors, was pressing him. At Sanger, Calif., on June 9 Davis clocked 13.5 for the 120 highs to equal Attlesey's world mark. The runnerup was Joel Shankle, who ran 13.7. Calhoun won the NCAA title in 13.7 and did a 13.6 to win the AAU crown. However, in a heat at the AAU meet Davis ran 13.4 to set a new world mark. The Olympic Trials race was a thriller as Davis and Calhoun leaned into the tape in a deadheat for first in 13.8 as Shankle finished third. Just before the games Davis ran another 13.4 at Bendigo, Australia, which some people thought should have been a 13.3 time. Earlier in Europe on Sept. 22 a

German student, Martin Lauer, became the first non-American to crack 14.0 with a 13.9. In the Olympic Games final Davis got a poor start and had to really move to catch a hot Calhoun. They fought it out neck and neck over the last few hurdles with Calhoun just out-leaning Davis at the tape. Both were credited with 13.5 while Shankle was a distant third at 14.1 and Lauer fourth in 14.7.

After Davis retired Campbell, fresh from winning the Olympic decathlon, took over the record breaking with a 13.4 for 120 yards at Compton, Calif., in 1957. This was a torrid duel with newcomer Elias Gilbert also being given the same time. Olympic champ Calhoun won another NCAA/AAU double while in Europe the fast improving Lauer reduced the European record to a respectable 13.7 while Russia's Anatoliy Mikhailov ran 13.9 to equal the old standard.

In 1958 Calhoun, under a year's suspension from the AAU, sat out the season and the leading American hurdler was 13.6 man Hayes Jones of Eastern Michigan, who also clocked 9.4 for the 100 yards. Jones won the AAU title but Gilbert was the NCAA winner. At the European Championships in Stockholm, Lauer walked away with the title in 13.7 but Lauer's greatest year was to come in 1959. At Zurich, Switzerland, on July 7 Lauer ran a 13.2 for the metric distance to shatter Davis' world mark. Many people refused to believe that Lauer's time was a genuine one but doubt ful or not Lauer became the first European since 1931 to hold or share a world high hurdles record. Lauer confirmed his greatness by cracking 14.0 some 13 times during the season. Mikhailov managed to defeat Lauer in one race and also lowered his best to a Russian record of 13.7 in September. The best U.S. hurdler was again Jones, who won the NCAA title, but the reinstated Calhoun came back to win the AAU gold medal, thus showing that he is determined to retain his Olympic title. However, Lauer will be the man to beat at Rome and interest will be heightened by the prospect of this young German attempting to break the virtual American monopoly of medals in this events.

THE FASTEST HUMANS ON BOARDS

Part Nine of a Series

By Wally Donovan

The 1949 season opened with Barney Ewell retired after 13 years of topflight sprinting. However, this did not makes things any easier for Ed Conwell and Tom Carey.

Ira Kaplan of New York University and Harrison Dillard of Baldwin-Wallace beat Carey in a sprint series at the Brooklyn Knights of Columbus meet. Dillard, the Olympic 100 meters champion, was making his Eastern indoor sprinting debut. A week later Kaplan again beat Carey in the 60 at the Metropolitan AAU meet with Conwell being eliminated from the final because of two false starts. That same evening at the Washington Evening Star Games, Marcellus Boston, the former Washington schoolboy star now running for the University of Iowa, won a sprint series from Bill Mathis, Bill Dwyer, former Brown sprinter, and Lorenzo Wright of Wayne State in Detroit.

Mathis beat both Conwell and Carey in the Philadelphia Inquirer 50 the following week and on the next night Conwell won the Boston K of C 50 from Stan Beckett by a foot. Fifth in this race was Jim Fuchs, Yale shot put star, who had eliminated Kaplan in the semis. Although no sprinter was dominating the season the shock which came at the Millrose Games was a surprise to everyone. In one of the biggest sprint upsets in Madison Square Garden's history, Dwyer defeated Conwell, Carey and Mathis in the 60 final. What's more, Dwyer also tied the 6.1 indoor record. Only a week before Dwyer had been eliminated in a heat at Boston.

Dwyer again met Mathis, Conwell and Carey in the 60 at the Boston A.A. Games but this time Conwell was the winner. Their next meeting was scheduled at the New York A.C. meet but Conwell pulled a muscle in practice and had to withdraw from the meet. Dwyer picked up another victory by edging Joe Cianciabella, Kaplan and Carey. After these two Garden victories Dwyer was installed as the favorite to win the AAU sprint crown, especially with Conwell out of the meet. Lloyd LaBeach of Panama was eliminated in the quarter-finals while Andy Stanfield of Seton Hall and Carey went out in the semis. That reduced the finalists to Basil McKenzie, the Jamaican Olympian from Seton Hall, Kaplan, Cianciabella and Dwyer. The former Brown star, now running for the Rhode Island Track and Field Officials Assn., scored a clean cut victory over McKenzie to win his first national title. Kaplan was third and Cianciabella limped in last after reinjuring a leg he had hurt earlier in the season.

At the IC4A Championships a week later Stanfield tied Ben Johnson's meet record of 6.2 to win his first major title with Fred Johnson of Michigan State second. Conwell was now back in action and warmed up for his next meeting with Dwyer by winning the 60 at the New York Pioneer Club meet. He ran a 6.3 without the benefit of spikes. At the New York K of C meet Dwyer met Conwell again and so great was the field in this meet that Carey, McKenzie, Stanfield and LaBeach failed to make the final. A surprise was Jim Fielding of Seton Hall Prep, who made the final along with Mathis, Dwyer and Conwell. Although he had to come from behind Dwyer again beat Conwell, thus giving him a sweep of all the Garden races in which he started. Dwyer, who was now ranked the top sprinter indoors, beat Stanfield and Fielding in a 50 at Providence, R. I., but lost to Mathis in Cleveland and Chicago.

The sprint series at the 1950 Brooklyn K of C meet was won by Kaplan, who beat Cianciabella and Doug Fowlkes of the New York A.C. In the sprint series at the Washington Evening Star meet a 17-year-old newcomer -- Henry Thresher of Mercersburg Academy -- surprised by winning the 70 and 80 and finishing second in the 100 to Fielding, now a Georgetown frosh.

At the Philadelphia Inquirer meet, Stanfield, the National AAU outdoor sprint king, made his season's debut and had little trouble disposing of Cianciabella, Kaplan and Bennie Wright of the Chester Track Club in the 50. Fielding won the Boston K of C sprint as Dwyer ran fifth. However, Stanfield continued to dominate whenever he ran. He won the Millrose 60 from Kaplan and Dwyer in 6.4 but his dominance was short-lived as Kaplan beat him in the Boston A.A. 50. Kaplan won the New York A.C. sprint with Stanfield absent but Andy ran in the AAU 60 and won from Dwyer, Carey and Kaplan. Stanfield also won the IC4A 60 and took second in the broad jump.

At the New York K of C meet Dillard promised to give Stanfield a good battle but the race never materialized. Dillard scratched from the final after winning his heat and Stanfield went on to beat Dwyer, Kaplan and Carey for the title. The victory gave Stanfield the title of number one indoor sprinter.

Stanfield came back in 1951 to defend his sprint ranking after suffering a muscle pull during the early part of the 1950 season. Standing in his way was Conwell, who was making a comeback after a year's suspension by the AAU. Conwell had tried out for the Buffalo Bills pro football team and even though he hadn't signed a contract was forced by the AAU to hang up his spikes for a year. Stanfield seemed sound as he won all three races in the sprint series at the Brooklyn K of C meet. At the Senior Metropolitan AAU meet Kaplan won the sprint title for the third straight year while runnerup in the race was Lindy Remigino, a Manhattan sophomore. A visiting British Empire star, Emanuel McDonald-Bailey of Trinidad, won the sprint series in Washington from Art Bragg of Morgan State with Thresher third.

McDonald-Bailey and Bragg met Conwell in a 50 at the Philadelphia Inquirer Games and Bullet Ed came through with a 5.3 victory. Conwell followed this up with a victory over Stanfield the next night in Boston. At the Millrose Games Stanfield repeated his 1950 triumph by beating Remigino and John O'Connell, another Manhattan sophomore sprint whiz. The race lost some of its punch when Conwell was disqualified from the final because of two false starts.

Stanfield, who was having trouble winning at Boston, overcame that jinx by taking the 50 at the Boston A.A. Games. It was his fourth try for a win in the Hub city. Conwell was second and young O'Connell third. Conwell beat Dwyer in the New York A.C. 60 with Thresher third and Remigino last. Stanfield and Conwell continued their sizzling duel for seasonal sprint honors at the National AAU Championships. Included in the field were Jerome Biffle of the U.S. Army, Jim Caffey of the C. Y. O. in Chicago and Jim Bibbs of Eastern Michigan (then Michigan Normal). All three were eliminated in the semi-finals along with Remigino. That left the finalists as Stanfield, Dwyer, Conwell and Bragg. Conwell used his usually fast start to good advantage and won his fourth national indoor title by beating Stanfield by inches with Dwyer third and Bragg fourth.

Stanfield won the IC4A sprint and then he was ready for another race with Conwell. This race just about decided the number one indoor sprinter ranking of 1951. Conwell won the New York K of C 60 and that gave him the top ranking among the indoor sprinters for the year.

(Next Installment -- Pennsylvania's John Haines challenges the indoor sprinters.)
