

INTERSCHOLASTIC HONOR ROLL

The committee has endeavored to compile a list of the outstanding performances in the high school track meets of the country during the season of 1929. Most of the records have been selected from the reports of the various state meets. The committee desires that the principals and athletic directors of the country send in reports of especially good records and that attention be paid to see that records are made under recognized conditions. These reports should be sent to E. A. Thomas, National Reserve Building, Topeka, Kansas.

An attempt was made this year to place on the honor roll those athletes whose records came up to a certain standard. For example, those whose 440-yard records were under 52 seconds were placed on the roll; likewise, those whose 880-yard records were under 2 minutes and 2 seconds. The standards set this year may not meet with the approval of the majority of high school coaches, but some standard will have to be set if an honor roll which means anything is established for the high school athletes of every state in the union.
