(this was a great race: 7 relay teams, 2 men and 2 women on each team! all the athletes loved it, but the coaches set the race up somewhat in seriousness. i believe they would like to see development of a both-sexes relay race as a regular event. there is support for this in our state's high-school program.) i would appreciate reporting of this result in TN, just for the hell of it, to let other colleges see that it was performed, and to let other schools improve the time.
