Corporate Team Scoring:

For team scoring, corporate runners were separated from all the other runners. They were then ranked according to their placement among runners of their same class (OPEN separate from WOMEN separate from MASTERS separate from everybody else.) Rankings were added up for the first 5 members of each OPEN team and 3 members of each MASTERS and WOMENS teams. This number became the team's score or total points. The lower the number, the better. A perfect score for the OPEN class would be 1st + 2nd + 3rd + 4th + 5th or 15 points. One way Citicorp could have scored 47 points is to have had its runners place 1st, 3rd, 7th, 9th and 27th. I'm working on getting the full details for the corporate teams.
